## SUMMARY

---

A certified **Data Analyst** and **Project Manager** with over 4 years of experience in IT, specializing in leveraging data-driven insights to drive business success. Proficient in computational techniques, data analysis, data manipulation, visualization, predictive modeling, statistical analysis, machine learning, and business intelligence. Skilled in data extraction and analysis using **Python** libraries such as BeautifulSoup, NumPy, Pandas, Scikit-Learn, SciPy, Matplotlib, Seaborn, and Plotly. Experienced in **SQL**, database modeling, database management systems (DBMS), and **Power BI**. Adept at presenting complex analytical results in clear, actionable terms to support strategic decision-making and organizational growth.

## WORK EXPERIENCE

---

**Vitabiotics** – Data Analyst, Istanbul, Turkey

Jun. 2024 – Present

- Managing daily, weekly, and monthly sales and visit performance reports for a team of 20 sales personnel using SQL Server, Python, and Excel.
- Calculating monthly bonus entitlements based on performance metrics and automated reporting processes using Power Query in Excel.
- Providing real-time reports to management upon request, delivering data-driven insights to support business decisions.
- Streamlined data processing by optimizing SQL Server Integration Services(SSIS) workflows, resulting in a **40% reduction** in data loading times.
- Conducted data modeling and visualization in Power BI, enabling managers to monitor key performance indicators (KPIs) in real-time.

**Woongjin** – Data Analyst, Istanbul, Turkey

Oct. 2022 – Jun. 2024

- Extracted, processed, and analyzed complex datasets using visualization, and analytics tools.
- Collected and cleaned data with MS SQL Server using advanced queries and processed large datasets with Python.
- **Reduced company expenses by 21%** as a result of the analyzes carried out.
- Implemented a new CRM with reporting capabilities. **Cut costs by 15%** and improved efficiency.

**The Ministry of National Defense** – Project Manager, Ankara, Turkey

Sep. 2014 – Dec. 2017

- Worked as a **Project Manager** between 2014 and 2017, at institutions affiliated with the Ministry of National Defense.
- Used SQL, Excel, Word, and PowerPoint for about 3 years.
- Developed the Basic Performance Indicators to monitor the physical performance of the personnel and increased their performance by **41% in 2 months** by analyzing their physical characteristics.
- The skills gained in this 3-year period are data analysis, leadership, crisis management, problem-solving, adaptability, collaboration, time management, and multitasking.

## PROJECTS

---

- **Car Price Prediction Exploratory Data Analysis (EDA) and Machine Learning Project (Including Model Deployment with Streamlit and AWS EC2):** Building a price prediction model using features of cars such as make & model and body type. **Skills:** Data Cleaning, Data Wrangling, Feature Engineering and Analysis, Pandas, Seaborn, Sklearn, Streamlit
- **E-Commerce Data Profitability Analysis:** Creating a dashboard to focus on expanding profitable sub-categories and continuing trends in profitability. **Skills:** Power BI
- **State-Level COVID-19 Analysis of the United States of America:** Creating a dashboard to track COVID-19 cases in the United States. **Skills:** Tableau.
- **E-Commerce and Customer Retention Project:** Analysis of the sales and delivery system of an E-Commerce Company. **Skills:** SQL
- **E-University Database Management System (DBMS) Project:** An example university registration data model and database. **Skills:** SQL
- **Customer Segmentation Clustering:** Segmentation of customers using unsupervised data. **Skills:** K-means Clustering, RFM Analysis, Cohort Analysis, 3D Visualization.
- **Employee Churn Machine Learning Project:** Predicting churn employee status using several features. **Skills:** Cluster Analysis, K-Nearest Neighbors (KNN), Random Forest, Gradient Boosting.
